May 1, 2007

This letter is a recommendation for Susan Peters. She worked with myself, and our St. Therese Catholic Church, Pastor Rev James McAndrews, S.J. in 2000. We were building a 28,000 square foot Parish Life Center. The building which contains 12 classrooms, a library, offices, music rooms, multipurpose room and kitchen required several areas of extensive stained glass windows. Each window had a specific theme and all were different sizes and shapes.

Susan was a delight to work with, her creative design skills and the ability to perceive how colors, shapes and art work together was outstanding. This coupled with her absolutely impeccable quality in the actual production and installation of the stained glass windows is without a doubt of the highest quality. She created windows of all sizes and designs, depicting each theme as we requested. Susan always worked with a smile and made us feel comfortable. Included in our designs were one very large and unique window. Now five years later we have not had a single problem with any of her work.

I would not hesitate to highly recommend Susan for this type of work and I know that our parish would look to her again in the near future, when we will be building a new church.

Sincerely,

Marlene Stowe

Former Capital Campaign Chair and Executive Building Committee Member  
St Therese Catholic Church
